

Going Green —————

KIMPTON  
*MARLOWE*  
HOTEL

## *Preserving Our Planet*

*Sustainable + Eco Hotel in Cambridge*

As we embrace being voted the #1 hotel in Cambridge, a premier travel destination with international appeal, we strive to pay it forward and look for ways to be as environmentally friendly as possible. We love our Cambridge community, and our green business practices are more important now than ever. Rest easy at Kimpton Marlowe Hotel knowing that with each stay, we're continuing to find ways to reduce our footprint in our local community and beyond:

- *Our Plant Pals Program is designed to brighten our guests' mood during their stay. They can adopt and take care of a plant by watering it and making sure it gets plenty of sunlight.*
- *All light fixtures in our guestrooms, corridors and public spaces use energy-efficient LED bulbs.*
- *All faucets, shower heads and toilets utilize low flow water systems to help conserve water usage.*
- *Guestroom HVAC units filter fresh outdoor air to create a comfortable atmosphere. Units are motion-activated, which limits unnecessary energy expenditure.*
- *Guess what happens to all the paper, plastics, glass, cardboard, crates, pallets and other materials that can be recycled? They get recycled, not sent to the landfill.*
